LAW

ON RATIFICATION OF THE TREATY ESTABLISHING THE ENERGY COMMUNITY BETWEEN THE EUROPEAN COMMUNITY AND THE REPUBLIC OF MONTENEGRO

Article 1

The Treaty Establishing the Energy Community between the European Community and the Republic of Montenegro, signed by the Republic of Montenegro in Thessaloniki on 25 October 2005, is hereby ratified, with the original copy in English language.

Article 2

Text of the Treaty Establishing the Energy Community in the original copy in English and in the translated copy in Montenegrin reads as follows:

Treaty

establishing the Energy Community

The Parties, being:

The European Community on the one hand,

And

The following Contracting Parties on the other hand:

- The Republic of Albania, the Republic of Bulgaria, Bosnia and Herzegovina, the Republic of Croatia, the former Yugoslav Republic of Macedonia, the Republic of Montenegro, Romania, the Republic of Serbia (hereafter referred to as the Adhering Parties),

And

- The United Nations Interim Administration Mission in Kosovo pursuant to the United Nations Security Council Resolution 1244,

Consolidating on the Athens Process and the 2002 and 2003 Athens Memoranda of Understanding,

64. LAW ON RATIFICATION OF THE TREATY ESTABLISHING THE ENERGY COMMUNITY BETWEEN THE EUROPEAN COMMUNITY AND THE REPUBLIC OF MONTENEGRO

Noting that the Republic of Bulgaria, Romania and the Republic of Croatia are Candidate Countries for accession to the European Union, and that the former Yugoslav Republic of Macedonia has also applied for membership,

Noting that the European Council in Copenhagen in December 2002 confirmed the European perspective of the Republic of Albania, Bosnia and Herzegovina, and Serbia and Montenegro, as potential candidates for accession of the European Union, and underlined the determination to support their efforts to move closer to the European Union,

Recalling that the European Council in Thessaloniki in June 2003 endorsed "The Thessaloniki Agenda for the Western Balkans: moving towards European integration", which aims to further strengthen the privileged relations between the European Union and the Western Balkans and in which the European Union encouraged the countries of the region to adopt a legally binding South-East Europe energy market agreement,

Recalling the Euro-Mediterranean Partnership Process and the European Neighbourhood Policy,

Recalling the contribution of the Stability Pact for South East Europe that has as its core the need to strengthen co-operation amongst the states and nations of South East Europe and to foster the conditions for peace, stability and economic growth,

Resolved to establish among the Parties an integrated market in natural gas and electricity, based on common interest and solidarity,

Considering that this integrated market may involve at a later stage other energy products and carriers, such as liquefied natural gas, petrol, hydrogen, or other essential network infrastructures.

Determined to create a stable regulatory and market framework capable of attracting investment in gas networks, power generation and transmission networks, so that all Parties have access to the stable and continuous gas and electricity supply that is essential for economic development and social stability,

Determined to create a single regulatory space for trade in gas and electricity that is necessary to match the geographic extent of the concerned product markets,

Recognising that the territories of the Republic of Austria, of the Hellenic Republic, of the Republic of Hungary, of the Italian Republic, and of the Republic of Slovenia are naturally integrated or directly affected by the functioning of the gas and electricity markets of the Contracting Parties,

Determined to promote high levels of gas and electricity provision to all citizens based on public service obligations, and to achieve economic and social progress and a high level of employment as well as a balanced and sustainable development through the creation of an area without internal frontiers for gas and electricity,

Desiring to enhance the security of supply of the single regulatory space by providing the stable regulatory framework necessary for the region in which connections to Caspian, North African and Middle East gas reserves can be developed and indigenous reserves of natural gas, coal and hydropower can be exploited,

Committed to improving the environmental situation in relation to gas and electricity, related energy efficiency and renewable energy sources,

Determined to develop gas and electricity market competition on a broader scale and exploit economies of scale,

Considering that, to achieve these aims, a broad ranging and integrated market regulatory structure needs to be put in place supported by strong institutions and effective supervision, and with the adequate involvement of the private sector,

Considering that in order to reduce stress on the state level gas and electricity systems and contribute to resolving local gas and electricity shortages, specific rules should be put in place to facilitate gas and electricity trade; and that such rules are needed to create a single regulatory space for the geographic extent of the concerned product markets,

64. LAW ON RATIFICATION OF THE TREATY ESTABLISHING THE ENERGY COMMUNITY BETWEEN THE EUROPEAN COMMUNITY AND THE REPUBLIC OF MONTENEGRO

Have decided to create an Energy Community.

TITLE I - PRINCIPLES

Article 1

 - (b) create a single regulatory space for trade in Network Energy that is necessary to match the geographic extent of the concerned product markets,
 - (c) enhance the security of supply of the single regulatory space by providing a stable investment climate in which connections to Caspian, North African and Middle East gas reserves can be developed, and indigenous sources of energy such as natural gas, coal and hydropower can be exploited,
 - (d) improve the environmental situation in relation to Network Energy and related energy efficiency, foster the use of renewable energy, and set out the conditions for energy trade in the single regulatory space,
 - (e) develop Network Energy market competition on a broader geographic scale and exploit economies of scale.
